The strict sanitary rules INESC require powerful machines, with special washing processes for hospitals, pharmaceutical, nuclear and cosmetic industries, penitentiary centers, etc.

The FAGOR barrier washers range is very wide and stands out for its advanced technology and features, high-speed spinning and easy installation with capacities from 16 to 100 kg; they are perfect for adapting to the needs of this very specific and demanding market. Installed between two separate areas, avoids any contact of re-contamination during the process. It also has a high percentage of increased production in a high percentage.

We distinguish between three ranges of FAGOR barrier washers, organised by features and capacities. The two smallest models are 16 and 22 kg, with new TP2 microprocessor, 4.3” and a second display as option on the clean side of the machine. The middle range has capacities 27, 35, 50, and 70 kg, a completely new range, with TP2 microprocessor with a 7” touch screen, the second display as standard, huge loading doors and many outstanding features. The last is the biggest model, a 100 kg Pullman type barrier machine.

BARRIER WASHER EXTRACTORS FOR ALL TYPE OF BUSINES.
OUTSTANDING FEATURES

- Screen on both sides of the machine.
- 8 dosing signals as standard.
- Traceability as standard.
- User friendly and totally programmable with TP2.
- Remote communication ready.
- USB connection. PC software free of charge.

Optional:

- Wet cleaning.
- Height of loading (door bottom): 800 mm.
- Easy friendly drum opening by push button.
- Huge doors opening making easier the loading and unloading operation.
- Touch operated on the dirty side and only for programming, traceability, data analyses...
- Customization of programs according to the market.
- 6 extra dosing signals.
- Printer.
- WIFI connection.

EFFICIENCY

- Intelligent weighing system.
- Possibility of configuring three levels of washing, soft, hard, and very hard.
- Low steam pressure: to enable installation of all washig cycles.
- Heat recovery.
- Power failure.
- Reduced residual moisture.
- Automatic weighing system on feet.
- Frictionless power failure.

CONEXIONES / CONNECTIONS

- Technical menu.
- Central drain Easy installation.
- Automatic positioning of drum with motor brake.
- G Factor 350.
- Possibility of configuring three levels of washing, soft, hard, and very hard.
- Less than 10 liters of water per kg and cycle operation.
- Washing speed r.p.m. 45.
- Spining speed r.p.m. 1000.
- Drum compartments 1.
- Drum opening dimesions mm 400x315.
- Vat opening dimensions mm 455x415.
- Depth mm 500.
- Height base door mm 670.
- Max. power (kW) (Steam model) kW 2,2.
- Net weight (kg) 438.
- Diameter mm 633.
- Volume l 158.
- Load capacity 1:9 kg 18.
- DIMENSIONS

- Width (mm) mm 984.
- Depth (mm) mm 914.
- Height (mm) mm 1398.
- Width (mm) mm 1072.
- Depth (mm) mm 1098.
- Height (mm) mm 1577.
